Summary

Front-End Developer with 2+ years of experience building enterprise-grade web applications, SaaS platforms, and large-scale administrative systems using **React**, **Next.js**, **TypeScript**, and modern frontend technologies. Leverages **AI-assisted development tools** and integrates **AI capabilities** into modern web applications. Experienced in delivering business-critical solutions for enterprise clients, designing scalable architectures, optimizing application performance, and implementing secure authentication, API integrations, and multilingual user experiences. Passionate about creating high-quality, maintainable products that combine exceptional user experience, clean code, and measurable business impact.

Professional Experience

- Front-End Developer, Secured Smart Systems (3S Group)**10/2025 – Present | Cairo, Egypt
- Build enterprise admin portals for large-scale clients including **TMG (Talaat Moustafa Group)** using React, TypeScript, Redux Toolkit, TanStack Query and Fluent UI.
 - Integrate **OIDC authentication** and authorization, and consume backend services through an enterprise Admin Gateway architecture.
 - Implement **role-based access control**, multi-step workflows and PDF/Excel exports for operational and administrative teams.
 - Deliver full **Arabic/English localization** with i18next and RTL/LTR layouts across all products.
 - Build **reusable, design-system-driven components** with Fluent UI and the internal @3s/components library, improving UI consistency and development speed.
 - Leverage **AI-assisted development** (Claude Code, Cursor, Codex, GitHub Copilot) for scaffolding, refactoring, unit testing and code review, accelerating feature delivery.
- Front-End Developer, DATA C**11/2024 – 01/2026
- Designed and delivered **CMS-driven web applications** from scratch with React, Next.js, TypeScript, Tailwind CSS and Directus, integrating REST and GraphQL APIs.
 - Improved page load times by **up to 50%** through React Query caching, lazy loading, code splitting, memoization and asset optimization.
 - Built highly interactive, responsive interfaces with GSAP, Framer Motion and Three.js.
 - Worked in Agile teams with UX/UI designers, backend engineers and stakeholders to ship production-ready features.

Education

Bachelor of Engineering in Communications and Computer Engineering2021 – 2026
Faculty of Engineering, Tanta University

Technical Skills

- **Core** — TypeScript, JavaScript (ES6+), React.js, Next.js (App Router, SSR, SSG), HTML5, CSS3
- **State & Forms** — Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod
- **APIs & Integration** — REST, GraphQL, OpenAPI, Axios, WebSockets
- **UI & Styling** — Tailwind CSS, Fluent UI, Radix UI, Shadcn UI, Material UI, Storybook
- **Testing** — Jest, Vitest, React Testing Library, Cypress, Playwright
- **Security & i18n** — OIDC, OAuth 2.0, JWT, RBAC, i18next, RTL/LTR (Arabic/English)
- **Performance** — Core Web Vitals, Lighthouse, Code Splitting, Lazy Loading, WCAG
- **CI/CD & DevOps** — Azure DevOps Pipelines, CI/CD, Automated Build & Test, Code Reviews
- **Tools** — Git, GitHub, Docker, Vite, Jira, Figma, Postman
- **Backend & CMS** — Node.js, Directus, PostgreSQL, Firebase
- **Animation & Charts** — GSAP, Framer Motion, Three.js, Recharts
- **AI & LLMs** — Claude Code, Cursor, Codex, Copilot, Prompt Engineering, LLM APIs (OpenAI, Claude, Gemini)
- **Architecture** — Feature-based & Clean Architecture, SOLID, Design Patterns, OOP, Agile / Scrum

Projects

IHUB Portal — International Hub Integration Admin Portal

08/2026 – Present

React · TypeScript · Redux Toolkit · Fluent UI · Tailwind CSS · Vitest

- Contributing to an enterprise admin portal for managing parties, endpoints, contracts and integrations between organizations.
- Built the **Integrations module end to end** (filterable list, validated forms, details view, status toggle) on a typed **OpenAPI client** service layer with localized error handling.
- Delivered Arabic/English RTL/LTR support and **Vitest + React Testing Library** unit tests in a lazy-loaded, feature-based architecture.

TMG Marketing Management Tool — Campaign Management Platform

04/2026 – Present

React · TypeScript · Fluent UI · OpenAPI · i18next

- Building a marketing operations platform covering multi-channel campaigns, announcements, audience targeting and performance reporting, with role-based access control for privileges and employee management.
- Integrated an auto-generated OpenAPI/REST client and built generic sortable data tables, pagination and filter panels shared across all modules.

Biometric Identity Management System (BIMS) — Admin Portal

03/2026 – Present

React · TypeScript · TanStack Query · React Hook Form · Zod · Radix UI · Tailwind CSS

- Built the admin portal for an **enterprise biometric identity platform**: enrollment, verification, devices and system administration.
- Delivered the multi-step enrollment wizard with **face, fingerprint, iris and voice capture**; now building the identity verification module against matcher APIs.
- Designed a feature-based architecture with React Query, Zod-validated API contracts and React Hook Form, with accessible Radix UI + Tailwind UI and full Arabic/English RTL support.

TMG Membership Admin Portal — Enterprise Membership Management

10/2025 – 03/2026

React · TypeScript · Redux Toolkit · Fluent UI · OIDC · i18next

- Developed an enterprise membership platform for **TMG (Talaat Moustafa Group)**, covering the full member lifecycle from registration and activation to renewal and expiry.
- Built key modules including a **multi-step registration wizard**, member dashboards, waiting lists, quick registration, General Assembly tracking and PDF/Excel exports.

N-Vestia — AI Investment Matchmaking Platform

05/2025 – 01/2026

React · TypeScript · Redux Toolkit · Directus · PostgreSQL · OpenAI / Google GenAI

- Developed an **AI-powered platform** connecting startups and investors across the MENA region, with secure investor-startup workflows, e-NDA management and trust scoring.
- Integrated **Google GenAI and OpenAI for intelligent matching**, entity resolution and recommendations, on a **Directus and PostgreSQL backend**.
- Implemented admin moderation tools, secure document workflows and GDPR/CCPA-aligned compliance features.

OnSoftwares — SaaS Marketplace Platform

12/2024 – 05/2025

React · TypeScript · Redux Toolkit · Tailwind CSS · Directus

- Built a full-stack SaaS marketplace enabling software vendors to showcase, manage and distribute digital products on a scalable, CMS-driven architecture powered by Directus.
- Developed **AI-powered search and skill matching** to help users discover relevant software solutions faster.
- Implemented interactive dashboards, dynamic forms and role-based workflows with React Hook Form and Zod, delivering responsive, high-performance UIs.

Portfolio , Interactive Developer Portfolio | *React, TypeScript, Tailwind CSS, GSAP, Zustand*

- Created an immersive macOS-inspired developer portfolio using React, Tailwind CSS, GSAP, and Zustand; features draggable windows, interactive dock, fluid animations.
- Developed a dedicated Dev Docs section highlighting in-depth technical guides, live demos, and code breakdowns of React, Next.js, TypeScript, and modern frontend projects.
